

InFocus Remote Front Cover Replacement

Replace the front cover of your InFocus remote control.

Written By: Paige Reisman

INTRODUCTION

Use this guide to replace the front cover of your InFocus remote control and also to access the internal components for further repair.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [iFixit Opening Picks set of 6](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Front Cover

- Use your finger to press the tab on the battery cover.
- Lift the cover up and out.

Step 2

- Use your finger to lift the two AA batteries up and out of the remote.

Step 3

- Remove the three 9mm Phillips #00 screws located on the backside of the remote.

Step 4

- Insert a plastic opening tool into the seam between the black top cover and silver base at the bottom edge of the remote.
- Carefully pry the top cover up and away from the base.

Step 5

- Insert an opening pick into the seam on side of the remote, even with the InFocus Label.
- Slide the opening pick along the side of the remote, moving towards the buttons.
- ⓘ There is a plastic tab that holds the covers to the base, located even with the Source button. Push the pick through with a bit more force here to disconnect the cover.

Step 6

- Repeat the previous step on the other side of the remote, working from the InFocus label towards the buttons until the entire cover is loose.

Step 7

- Firmly grasp the cover and lift it away from the remote.

To reassemble your device, follow these instructions in reverse order.
